# EVERGREENS Azaleas, Rhododendrons

Bobbink & Atkins
Rutherford New Jersey

# Publications by Bobbink & Atkins

Besides this catalogue, we publish two other important descriptive books:

# ROSES

By BOBBINK & ATKINS

The largest and finest catalogue of Roses in the world. It has many pictures of the best varieties in color, and the descriptions are very full, accurate, and frank.

### HARDY HERBACEOUS PLANTS

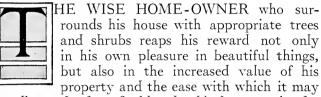

An exhaustive descriptive book of Perennials of all sorts comprising one of the most complete collections in America. A standard book of reference for the careful gardener.

In addition to these three main catalogues we have folders, booklets, and leaflets on special subjects as follows:

New Hybrid Giant-Flowering Marshmallows
Vines and Climbers for Every Place and Planting
Berried Shrubs for Bird Gardens
Rock Gardens: What Plants to Use
Home Grounds: Their Planning and Planting
Heart Cypress Tubs

Ask for the catalogue or folder regarding the items which you intend to plant

# **EVERGREENS** AZALEAS AND RHODODENDRONS

be disposed of profitably, should the necessity for doing so arise.

Everyone realizes that planting of some sort is necessary. To limit it to a bare expanse of lawn and a privet hedge is to show poor enterprise and a serious lack of imagination.

The world is full of extraordinarily beautiful trees and shrubs, both evergreen and deciduous, from which fitting and desirable material may be chosen to enhance both the esthetic and intrinsic value of

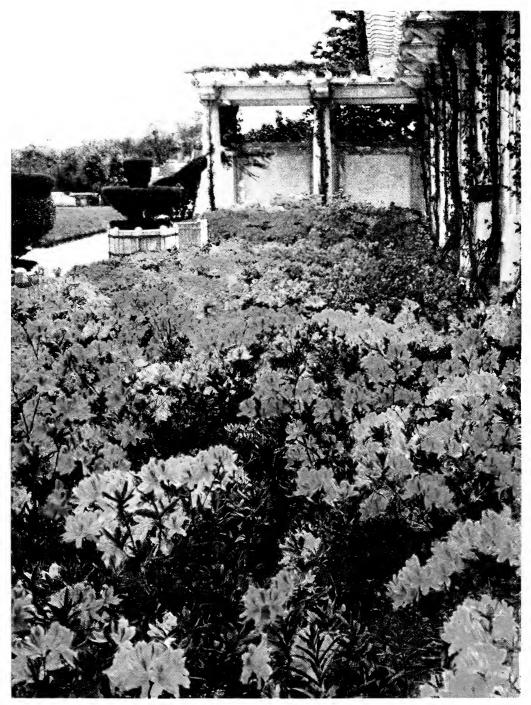

the property.

This catalogue describes a very extensive variety of plants for both small home grounds and large estates; and we are particularly happy to be able to offer a very choice selection of some of the rarest and most beautiful things scarcely to be duplicated elsewhere. We call particular attention to our collection of Magnolias, Rhododendrons, and Azaleas, which is unrivaled in American horticultural commerce.

# BOBBINK & ATKINS

RUTHERFORD · NEW JERSEY

AZALEA MOLLIS

Massed in this fashion the gorgeous beauty of these Azaleas is seen to best advantage. Practically every shade of yellow from lemon and cream to brownish gold and orange is mingled in a lovely harmony of color. See page 32.

# Evergreens and Conifers

### Planting and Cultural Directions

E cannot recommend Evergreens too strongly. No home-grounds are complete without them. They are beautiful both in winter and in summer; in winter they supply the only living green in the land-scape, and in summer their rich, dark foliage contrasts beautifully with the brighter tones of deciduous trees and shrubs. They make an ideal background for any house, giving a gracious and dignified appearance which cannot be produced in any other manner.

These suggestions are of a general nature only, applicable to the usual or average conditions. They may

be easily modified to suit individual requirements and special cases.

All our Evergreens are dug with a ball of earth about the roots, tightly wrapped in burlap. Smaller and medium-sized evergreens are wrapped in a very light grade of burlap which need not be removed when planting. Merely open the top of it after sufficient earth has been packed about the ball to prevent any disturbance of the roots. Heavier plants are wrapped in stronger burlap which ought to be removed when planting, or cut open in the manner described below.

When to Plant. Evergreens may be planted at any time, if the work is properly done; but best results are

obtained by planting in early spring, late summer, and early autumn.

Planting. Unpack the plants upon arrival and place them somewhere in the shade where there is no draft. The interior of a cool building or cellar is a proper place to keep them until the actual moment of planting.

Dig holes for the plants, 8 to 10 inches larger in diameter than the size of the ball, and about 2 inches deeper than its depth, so that the plant will be about 2 inches lower when planted than it stood in the nursery. Loosen the soil in the bottom of the hole and save the dark topsoil for filling in next the roots. If more rich soil is needed than what is taken from the hole, use good garden earth mixed with thoroughly rotted manure.

Without removing the burlap, set the plant in the center of the hole, facing it so that the best side of the top is toward the front. Cut the burlap away from the stem and about half way down the sides of the ball, leaving the rest of it in the bottom of the hole. Do not break the ball or expose the roots to the air any more

than is absolutely necessary.

Pack the topsoil or prepared earth around the ball to within 3 inches of the top of the hole. Then fill the remaining space with water and let it stand over night. Finish planting the next day, leaving a saucer-like depression about the plant to hold rain-water and facilitate artificial watering.

### The After-Care of Evergreens

The success of an Evergreen planting depends largely upon the manner in which they have been planted

and the attention they receive during the first few years.

Watering should be done in late afternoon or evening, by letting the hose run slowly at each plant long enough to saturate the ground thoroughly down to the lowest roots. In normal weather once in ten days or two weeks should be sufficient, but during hot, dry spells newly planted evergreens should be watered oftener. Evergreens should not be allowed to grow unrestricted, but be kept trimmed back to the desired height

and width by occasional shearing after growth starts in the spring but not after July 1.

They should be carefully examined for cone-shaped bags hanging from tip of branches. These should be

cut off and burned; they contain eggs of bag worms.

Syringe the under side of leaves with water from the hose once in a while during hot weather to control red spider. Do this early in morning on bright days. Spraying with a combination contact and poisonous mixture once or twice a month during growing season is advisable.

The value of an Evergreen is not decided by its height alone but also by its general shapeliness and com-

pactness. The method of pricing them by their height is for convenience only. Individual specimens, if selected in the Nursery by customers, will be priced according to their value, irrespective of the catalogue price.

While we have given prices at the each and ten rate, we can supply many of the varieties in 100 and 1,000 lots

TAXUS CUSPIDATA (capitata). Dwarf Japanese Yew. Of all the Yews this is the only hardy, upright-growing variety in the Northern States. A fast grower, standing our most severe winters and keeping its fresh color throughout the year. The brilliant scarlet fruits set in the shiny dark green foliage are very conspicuous. It was introduced from Japan many years ago and found here to be one of the most noteworthy and valuable Evergreens. As a hedge plant, it cannot be equaled for color and hardiness. Bushy compact specimens trimmed several times.

The American or common Hemlock is king of the Evergreen forest trees. We grow them in large quantities and have several blocks in various sizes, and invite inspection.

Effect obtained by planting B. & A. Evergreens

# Hardy Broad-Leaved Flowering Evergreens

### Rhododendrons

HODODENDRONS are the handsomest broad-leaved evergreens. Many plant-lovers think that they are difficult to grow, but this is not the case, if suitable varieties are used and proper soil and care are given them. The varieties we offer are absolutely hardy and will withstand our most severe winters and summers if the cultural directions below are followed.

Select a shady location for the Maximum varieties and give the Catawbiense varieties an open situation where they will get some sun. Protect both varieties from winds. A group of hardy evergreens on the north and west, sufficiently distant not to interfere with the roots, will protect them from the worst winds. If this is not practicable, some evergreen boughs placed between the plants are very effective in breaking cold winds and protecting them from the sun's rays in March and April. Always plant in groups, as this will protect the soil from frost and give them the same conditions that they have in their natural habitat.

The soil is most important. Light garden loam is best, but if clay soil must be used, lighten it with sand. Leaf-mold, decayed sod, or surface soil that has been heavily manured the previous year—all are good. If possible, dig the soil to a depth of at least 24 inches before winter, and allow to settle for spring planting. A most important thing is to avoid lime in any form. Rhododendrons like sour soil, and enjoy a liberal admixture of peat, decayed oak leaves, or any other acid-producing agent. A liberal sprinkling of aluminum sulphate over the ground several times a year will tend to maintain the acid conditions they enjoy.

The site should be well drained. A gentle slope or bank is ideal, but whatever the situation it must be managed so that water will not stand about the roots. At the same time Rhododendrons enjoy plenty of moisture and the texture of the soil should be such that it will supply them lots of water without being continually wet.

Make the Rhododendron beds at least 2½ feet deep, mixing the soil with decomposed manure or leaf-mold, and then group the plants in the most effective manner. All plants should be thoroughly soaked in water previous to planting. A mulch of about 4 inches of leaves or well-rotted manure (fresh manure may be used but make sure it is not fresh horse manure; that should be well decayed before using it on Rhododendrons) will help conserve the moisture which is so necessary to successful Rhododendron culture. Allow weeds to grow until they are large enough to be pulled by hand—never hoe the soil about the plants as the roots are near the surface. In the fall, after the ground has been slightly frozen, mulch the soil between the plants to a depth of 8 inches with leaves. This will protect the roots from the most severe frosts, and after a time the leaves will begin to decay and form leaf-mold—the best fertilizer for Rhododendrons.

#### RHODODENDRONS, continued

In May and June your Rhododendrons will be a mass of beautiful flowers—the Catawbiense varieties blooming from mid-May until mid-June, when the Maximums are at their best. As soon as the flowers have fallen, remove the seed-pods. If you want to make a planting of Rhododendrons on your home-grounds, we shall be glad to give you advice. Our experts have spent a lifetime in raising Rhododendrons, having grown many thousands of them from seedlings and grafts to full-grown plants. They know all about them, and can give you valuable advice about soil, location, and varieties.

All our Rhododendrons are grown in our own Nurseries, so we know exactly what varieties to recommend

for any locality. Our plants are sure to grow if you give them proper care.

### Rhododendron Hybrids

Some Rhododendrons are dwarf, never attaining a height over 2 to 3 feet; others grow very fast and when matured reach a height of 10 to 12 feet. We have divided them into four groups indicated by the letters (a) extra high; (b) high; (c) medium; (d) dwarf.

Azalea maxwelli

# Hardy Evergreen Azaleas

HE following varieties of Azaleas (lately classified under Rhododendrons) are generally known as Japanese Azaleas, and owe their origin largely to China and Japan.

On account of the large number of varieties and many shades of colors, they rank with the very handsomest, hardy, flowering Evergreens. We have experimented with a very large number of varieties in our Nurseries, and by rigorously discarding, one by one, those that were inferior, we have now an elite collection which we are growing in large quantities. Many of them have not found their way into American gardens.

Many an uninteresting corner of the home-grounds can easily be turned into an attractive, cozy spot by brightening it with a proper selection of the most suitable and brilliant Azaleas. These Evergreen Azaleas should be used extensively in groups with other hardy broad-leaved Evergreens. For rock gardens they are particularly unexcelled. For forcing or conservatory decoration they are invaluable.

We wish our patrons to become better acquainted with these interesting groups of Evergreen Azaleas. Many plant-lovers may think that they are difficult of cultivation, but this is not the case, if ordinary garden soil and care are given. Plenty of leaf-mold in the soil and as a mulch is beneficial, and while they flourish under the same conditions as Rhododendrons, to which you are referred for more detailed cultural directions, they are not so insistent upon acid conditions, but they do not like lime or limy soil. Many varieties are absolutely hardy and will withstand our most severe winters, but others are less hardy and need protection during our severe winters. A rather sheltered position is desirable. A mulch of well-decayed cow manure, or leaf-mold placed between the plants and a cover of hemlock or pine branches laid loosely over the top are all that are necessary. This protection is advisable for hardy varieties also.

Kinds marked with an asterisk (\*) need special protection in our Northern States.

Azalea Yodogawa

Azalea Yodogawa. A semi-evergreen, 

# Japanese Kurume Azaleas (FOR OUTDOORS AND FORCING)

These Azaleas were originally imported into California from the city of Kurume, on the Island of Kyashu, Japan, where they were discovered by Dr. E. H. Wilson of the Arnold Arboretum. From California, they found their way East where a few progressive nurserymen saw their possibilities and at once started propagation. Although not exactly new, they are still very scarce, and most varieties on our list are now offered for the first time.

For garden planting there is nothing to equal their usefulness when placed amongst broad-leaved evergreens, such as kalmia, rhododendrons, etc., being naturally protected in this manner. During the month of September, especially in a wet season when these Azaleas are making a second growth, the branches are full of sap and a light frost at this time is apt to split the bark. A thorough covering with dry hardwood leaves, such as oak or beech, allows them to be planted in borders, rockeries, beds, or in mass.

Hemlock or spruce boughs, brush, or chicken wire should be used to prevent

the leaves from being blown away.

In general, their cultural requirements are the same as those of Rhodo-dendrons, to which you are referred. They cannot endure lime or limy soil, require plenty of moisture, and good drainage.

For forcing in midwinter, Kurume Azaleas are very useful, adding a wealth of color to beautify conservatories.

The term "hose-in-hose" applies to a compound flower composed of two similar or identical, funnel-shaped corollas, one apparently growing out of the throat of the other.

Admiration. A beautiful pure pink with large trusses of medium-sized flowers. Large, glossy green foliage. Hose-in-hose type.

Apple Blossom. It resembles the apple blossom in

color, being a beautiful shade of pink, shading lighter

toward the center. Glossy green foliage. **Avalanche.** Pure white; very large flowers on large trusses. Glossy green foliage.

Bridesmaid. Glowing salmon flowers produced in large clusters; very prominent stamens. Small

glossy green foliage.
Brilliant. Salmon-rose with deeper salmon shading toward the edge of the petals.

ouquet Rose. The dainty, medium-sized rose-pink flowers shade much deeper toward the center, and Bouquet Rose. the red stamens form a beautiful contrast. Bronze-

Cattleya. A delicately lilac-tinted white, shading to mauve-pink at the edges. Semi-double.

Cheerfulness. Vermilion-red, shading deeper toward center. A strong-growing plant with glossy green foliage.

Cherry Blossom. Dainty light pink, with white shadings toward the center of the large flower. Large dark

green foliage. Hose-in-hose type. Christmas Cheer. This name was suggested by its very brilliant coloring—a real Christmas red. Glossy green foliage. Hose-in-hose type.

Coral Bells. A pleasing coral-pink color shading deeper

in the center. Not a very large flower, but very dainty and produced very profusely. Small, round,

glossy foliage. Hose-in-hose type.

Daphne. White inside with light lavender edges. A

Daybreak. Pure light pink flowers in dense clusters; very free-flowering. Beautiful green foliage. Delicatissima. White tinged or shaded pinkish lilac, with brown blotch. Large, dark green foliage.

TWELVE JAPANESE KURUME AZALEAS

Pink Pearl Coral Bells Vesuvius

# Bobbink & Atkins

#### JAPANESE KURUME AZALEAS, continued

Debutante. A beautiful shade of glowing salmon-pink, with lighter center, blotched with red; white stamens. Glossy green foliage.

Exquisite. Large salmon flowers. The name not only describes appearance of the flowers but also the graceful habit of the plant, and its beautiful green

Fairy. A light blush-pink, shading darker toward the edges, with darker blotch. The foliage is large and

Flame. Brilliant madder-red, with coppery suffusion; beautiful, medium-sized flowers. Glossy green foliage. Flamingo. A fine shade of salmon-red, with darker blotch. Beautiful large light green foliage.

Hortensia. Soft pink flowers, produced in large trusses. Lavender Queen. A fine shade of light lavender, with large white stamens, creating a beautiful effect in

the large flowers. Large, dark green foliage. Mauve Beauty. The name truly indicates the beautiful shade of mauve. The medium-sized, dainty flowers are very freely produced, transforming the plant to a solid mass of bloom.

Morning Glow. Bright rose-pink, striped and blotched darker toward the center. Glossy green foliage.

Mountain Laurel. White, with faint pink shading. Large, dark green foliage.

Orange Beauty. Orange-pink. The name truly indicates the beauty of color and large flowers in immense clusters, almost as large as rhododendron blooms.

Peach Blow. Delicate pale salmon-pink, resembling the blossom on peach trees. Strong-growing plant. Light green foliage.

Pink Pearl. A beautiful salmon-rose, shading lighter to the center; large full trusses. Hose-in-hose type.

Rose. Dark carmine-pink flowers, with almost red stamens; very attractive and produced very profusely. Hose-in-hose type.

Salmon Beauty. An exceptionally fine shade of salmonpink, with large individual flowers. Light green foliage. Hose-in-hose type.

Snow. Large, pure white flowers, borne profusely in clusters. Beautiful glossy green foliage.

Sunstar. Dark rose-pink with carmine stripe; not a large flower but very dainty and produced freely. Dark green foliage.

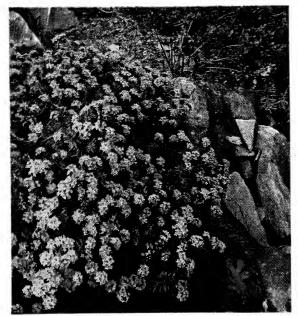

**Vesuvius.** Fiery salmon-red, with slightly darker blotch. The flowers are of medium size and produced very freely. Dark green, glossy foliage.

BERBERIS buxifolia (B. dulcis). A dwarf evergreen Barberry, excellent for bordering.

Each Pot-grown plants......\$0 75 \$6 50

BERBERIS JULIANÆ. This beautiful and rare evergreen variety, hardly known, is one of the best and hardiest of our broad-leaved evergreen shrubs. It stays perfectly green during the winter and blends well with plantings of rhododendron, kalmia, andromeda, and evergreens in general. To plant-lovers who always are looking for "something better," we recommend it very highly.

Pot-grown plants...........\$1 00 \$9 00
Ask for our special list on other varieties of
Berberis

#### Cotoneasters

The Cotoneasters belong to the rose family. They can scarcely be called true evergreens, because most of them shed their leaves before spring. They are classed among the handsomest shrubs for Northern gardens, offering a great diversity in habit, type of foliage, and fruit. The flowers are mostly rather inconspicuous but the form of the plants, their graceful sprays of foliage, and beautiful arrangement of leaves make them most attractive. In autumn their variously colored fruits are showy and last a long time. They vary in habit from large, bold bushes to dwarf spreading type adapted to the rock garden.

On account of the difficulty in transplanting fieldgrown Cotoneasters, we strongly advise the use of pot-grown plants.

COTONEASTER acutifolia. Peking Cotoneaster. Upright, dense shrub attaining a height of 12 feet. Elliptic dark green leaves I to 1½ inches long. Flowers in nodding corymbs in May and June. Purplish black fruit in September.

Pot-grown plants.....\$1 00 \$9 00 ambigua. A very hardy, spreading shrub, growing from 5 to 6 feet tall, with clustered fruit, at first crimson, changing to black. Each 10

Pot-grown plants ..... \$1 00 \$9 00

cotoneaster Horizontalis. Rock Cotoneaster. Curious, dwarf shrub of trailing habit, fine for rockeries. It is covered with brilliant red berries in autumn and winter. The foliage turns to soft tints of red and bronze before falling.

Each 10 100

Pot-grown plants......\$1 oo \$9 oo \$75 oo Specimen plants, in pots, \$2.50 to \$4 each.

microphylla. Rockspray. A dwarf shrub, with small, shiny leaves, longer than those of the former variety, and having long hairs beneath. Pretty white flowers are followed by scarlet berries; very showy.

Pot-grown plants.................................\$1 00 \$9 00

moupinensis. Mupin Cotoneaster. Spreading shrub to 6 feet, with ovate-acuminate leaves nearly glabrous above, pale grayish green and pubescent beneath. Pinkish flowers. Red, subglobose fruit.

6 to 8 feet tall, with spreading stems, shiny dark green foliage, and pinkish blooms followed by clustered, jet-black fruit.

Pot-grown plants.....\$1 00 \$9 00

pannosa. Silverleaf Cotoneaster. Semi-evergreen shrub 6 feet high. Elliptic leaves, glabrous above, grayish white beneath. Red fruit in fall. A very conspicuous, handsome shrub. Not quite hardy in our Northern States.

Pot-grown plants........\$1 00 \$9 00

Simonsii. Simon's Cotoneaster. A 4-foot shrub with spreading branches, almost evergreen, roundish oval leaves, pinkish white flowers in June and July.

One of the best red-fruiting species. Each 10

Pot-grown plants..........\$1 00 \$9 00

Erica vulgaris. See page 20

Ilex opaca

Cotoneaster racemiflora soongarica (C. soongarica). A 4-foot shrub with erect or spreading branches, rarely prostrate, oval leaves, grayish white beneath, and beautiful red fruit. Each Pot-grown plants.....\$1 00 \$9 00

Wilsonii. It is, perhaps, the best form of this wellknown species, with arching, overlapping, sail-like branches forming a neat, hummock-like mass in the open border and a fine screen against walls. Each 10

Pot-grown plants.....\$1 00 \$9 00

#### CRATÆGUS. See Pyracantha.

DAPHNE cneorum. Garland Flower. bushy plant forming a broad mat of wiry, almost prostrate stems covered with dark green leaves, each stem tipped with a dense cluster of rose-pink, deliciously fragrant flowers in May and August. One of the most beautiful little early-flowering shrubs, which is not nearly so well known as it ought to be. It thrives in half-shady places in the rockery or on rather rough banks. See color illustration, on page 18. Each 10 \$9 00 Pot-grown plants.....\$1 00 Extra-strong plants..... I 50 I3 50

D. Mezereum. See page 37.

ERICA. Heath. The majority of these Heaths are compact, low-growing, and as such are extremely useful for rockeries. The small foliage is densely arranged around the wiry little stems, and either when in full bloom or in midwinter makes a very pretty picture. Give some protection the first winter so that they become acclimated before receiving a check. Semi-shady location.

All varieties, 50 cts. each, \$4.50 for 10. All our Ericas are strong, pot-grown, bushy plants

Erica carnea (herbacea). Grows about 6 inches high; leaves arranged in fours; nodding, bell-shaped flowers along the stems.

Mackayi plena. Crawford's Heath. A conspicuous, prostrate variety with double, rose-pink flowers. July to October.

stricta. Corsican Heath. A compact, erect grower with pink flowers, July to September.

erecta. Flowers light pink, borne at ends of branches; upright grower. 12 to 15 in. July, August.

Tetralix. A compact, silver-gray variety.

vagans. Cornish Heath. Pale purplish red. I ft. August to September.

vulgaris (Calluna vulgaris). Scotch Heather. dense-growing shrub, with erect branches, covered with short, closely adpressed leaves. The pretty, bell-shaped flowers occur in great profusion toward tops of the shoots and are a pretty rosy color.

-alba (C. vulgaris alba). White Heather. The nodding white flowers are the only diversion from the preceding; a very pleasing contrast.

-Alportii. Crimson Heather. Dark crimson variety flowering in July and August.

-aurea (C. vulgaris aurea). Foliage golden in summer and red in winter; pink flowers.

Sirleyi. Clear white. One foot high. Foliage keeps beautifully green in fall. July to September.

-flore-pleno. The double-flowering form of the Scotch Heather.

MENZIESIA polifolia (Daboecia polifolia). Usually planted with heather, this pretty plant is little known in America. Dark green glossy leaves and spikes of large, drooping, purple bell-shaped flowers. 1½ feet. July to October. 50 cts. each, \$4.50 for 10.

-alba. A white variety of the above. 50 cts. each, \$4.50 for 10.

EUONYMUS japonicus. Japanese Euonymus. very useful and decorative shrub, with lustrous, deep green leaves. It has a bushy, upright habit. Needs winter protection here. Excellent for window-boxes. Each Pot-grown plants, 12 to 15 in....\$1 25 \$10 00

patens. New. A very attractive Japanese variety, with handsome, dark green foliage. Perfectly hardy in any climate. Strong bushy plants.

Each \$17 50 1½ to 2 ft.....\$2 00 2 to 2½ ft..... 3 00

For other Euonymus, see pages 37 and 50

ILEX crenata. Japanese Holly. Has small, oval, smooth, green leaves about 1/2 inch long; a rapid grower, forming a dense, compact bush, which can be shaped like boxwood.

\$30 00 1½ to 2 ft.....\$3 25 40 00

glabra (Prinos glaber). Inkberry; Winterberry. An upright, bushy shrub, 3 to 4 feet in height; rather narrow leaves, dark green and shiny above, pale beneath; a profusion of fine black berries in the Each fall. 10

Acer platanoides (Norway Maple) for the lawn

#### Ornamental and Shade Deciduous

HILE the collection of trees growing in our Nurseries is very extensive, and comprises almost every variety of any value, we have used extra precaution in the compilation of the following list, selecting only such kinds as possess distinctive decorative merit, and are suitable for lawn, park, avenue and street plantings. Deciduous trees can be safely planted in spring, after the frost has left the ground, before new growth has appeared, and in the autumn, after the foliage and wood ripen, until the ground freezes in winter. We cannot too strongly impress upon intending purchasers the importance of the proper preparation of the ground before planting. The popular method of squeezing a fine, healthy tree into a hole half the size in diameter of the roots, afterward filling in with hard-pan, has proved, beyond doubt, the common cause of failure, which is generally attributed to some fault or deficiency of the tree.

To insure successful results, the ground should be properly prepared previous to planting, enriching the soil, if necessary, with well-decayed manure. The hole should be dug at least 2 feet wider in diameter than the ball of roots; the depth will be governed by the nursery soil-line as indicated on stem. The roots should

be spread out in a natural way, filling in with fine soil and firmly pressing.

If you are not ready to plant the trees promptly upon their arrival, they should be immediately unpacked and heeled-in. This means opening a trench, placing the trees in an upright position, and thoroughly covering the roots with fine soil, pressing down firmly, which will prevent drying out of the roots. Do not unpack trees if weather is freezing. Should they arrive in a frozen condition or during severe weather, put them in a cool place, free from frost, until perfectly thawed. If deciduous trees or shrubs are delayed in transit, so as to become dried or shriveled, they should be completely buried—roots, trunk and branches allowing them to remain several days before planting.

Trees marked with an asterisk (\*) are of a pendulous or weeping habit

ACER. Maple. No family of trees is more widel	
used for general purposes than the Maples. Thi	
is not only because of the large number of species	s,
but because of the fine effects produced in general	ιl
outline and fall tints, so valuable to the landscap	e
designer. The foliage gives a pleasing shade and	d
is retained until late fall.	
dasycarpum (saccharinum). Silver Maple. Large	-
sized tree; rapid grower. Foliage deeply cut, five	
lobed, bright green above and silvery white under	
neath. A good all-round tree as it adapts itself to	o
a variety of soils and conditions. Each 10

### Japanese Maples, Acer japonicum and palmatum

These dwarf Maples are extremely useful in landscape schemes, for their wonderful coloring and fascinating habit. The foliage of the various species is widely different, some being so delicately cut as to be a mere network, and in color they range from vivid fresh green to deep purplish red. There are numerous variegated forms with curious golden markings. Planted separately, they develop into magnificent specimens, and beautiful effects can be obtained by grouping them, but the best situations are as accents in a shrubbery or tree border. They are peculiarly effective when placed so they may be glimpsed through openings in a planting of gray-green coniferous evergreens.

acer japonicum aureum. Golden Moon Maple. Foliage shaded in gold, with suffusions of green. Contrasts most beautifully with the darker shades of green in the shrubbery planting. Each

# Magnolias

#### A lawn is not complete without Magnolias

THE snow has hardly given way to the first rays of the March sun when the Magnolias unfold their delicate and lovely vari-colored blossoms, giving us the first taste of real spring.

Nothing is more fascinating than a Magnolia in full bloom, before the rest of the landscape really

Nothing is more fascinating than a Magnolia in full bloom, before the rest of the landscape really awakens. *Magnolia stellata*, the earliest to bloom, unfolds its silvery, star-shaped, naked blossoms in late March, some time before the foliage appears.

The large-flowering Chinese varieties follow Stellata. Of these Conspicua, Soulangeana, Alba Superba, and Alexandrina begin to bloom when Stellata is passing. By the time this last group has spent its beauty, Lennei and Soulangeana nigra take up the task of prolonging the display.

Some native Magnolias, such as Acuminata, Cordata, and Glauca begin to bloom in June and finish

in July.

By careful selection Magnolias can be had in flower from the end of March to July.

Magnolias are best planted in the open lawn. Nothing is more striking against a background of dark green conifers.

They thrive best in somewhat rich, moderately moist, but porous soil. Magnolia glauca will do best in low or swampy places.

#### Chinese Magnolias

The following seven Chinese Magnolias are one of our specialties, and we are now growing them in quantity. A list of varieties, sizes, and prices will be mailed upon request.

Magnolia conspicua. Yulan Magnolia. A large tree from central China, with spreading branches. The very large, creamy white, sweet-scented flowers, 6 inches across, appear in April. This is, no doubt, one of the most showy species. See color illustration, page 26.

Soulangeana. Saucer Magnolia. A popular shrub or tree with very large, campanulate, white flowers, more or less purplish outside; often fragrant. The general effect is ruddy pink. Blooms in April. See color illustration, page 26.

—alba-superba. Large Saucer Magnolia. Pure white; small tree. See color illustration, page 26.

—Alexandrina. Alexander Magnolia. Flowers similar to those of M. Soulangeana but appearing ten days later. Magnolia Soulangeana Lennei. Lenne Magnolia. A more shrubby tree with broad, large foliage. Flowers large cup-shaped, deep crimson outside; very showy. Blooms in May, about two weeks after Soulangeana. See color illustration, page 26.

—nigra. Purple Lily Magnolia. Bush shrub with many branches. Darkest purple flowers of all Magnolias; blooms later than the other Chinese

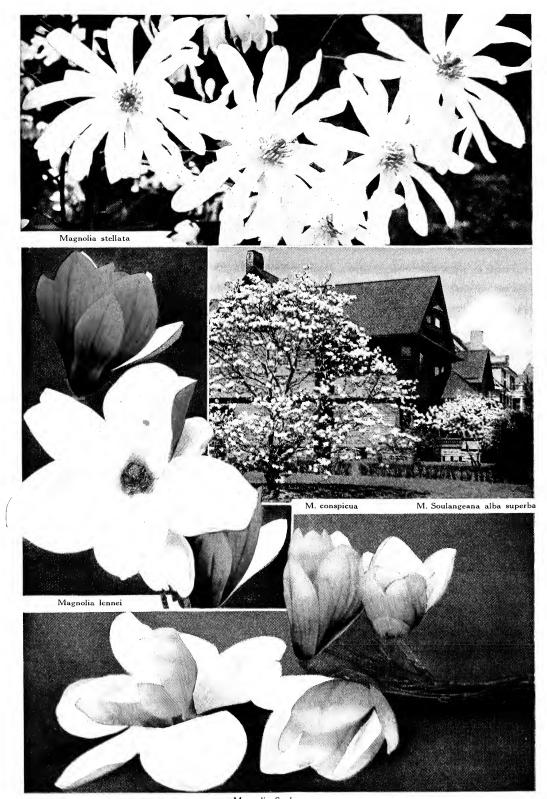

varieties (late in May).

stellata (Halleana). Star Magnolia. A dwarf species from Japan forming a round bush seldom over 10 to 12 feet high with small leaves. Pure white, semi-double flowers, about 3 inches across, appear before foliage. Very beautiful with narrow petals and starry form, delicate fragrance. It is the first Magnolia to bloom in the spring. See color illustration, page 26.

All above varieties, 1 to 11/2 ft., \$5 each, \$45 for 10, \$400 per 100

#### LARGER MAGNOLIAS READY NEXT AUTUMN

Upon request at that time we will gladly mail a special list showing varieties, sizes, and prices of the plants we have to offer.

Magnolia Soulangeana

Oxydendrum arboreum

#### NATIVE MAGNOLIAS

Magnolia acuminata. Cucumber Tree. A beautiful, pyramidal fast-growing tree; large foliage; greenish white flowers in May and June, and rose-colored fruits. An excellent tree for use as a lawn specimen,
and very showy in bloom and fruit. Each 4 to 5 ft\$2 50 5 to 6 ft3 50 31 00 10 to 12 ft7 50 65 00
cordata. Yellow Cucumber Tree. Very late-flowering species of fast growth, native in North America. Of erect habit, with canary-yellow flowers 4 inches across, lined with purple and appearing in June.  Each 10  I to 1½ ft\$3 00 \$25 00
glauca. Sweet Bay. Medium tree or bush. Foliage glossy green, very glaucous on under surface; white flowers 3 inches across in June; very fragrant. Will do best in low, moist, or swampy places.
Bushy plants—       Each         2 to 3 ft.       \$4 00         3 to 4 ft.       5 50
Kobus. Kobus Magnolia. A tree from Japan with narrow, pyramidal head, growing in its native land to 80 feet. The white flowers, 4 to 5 inches across, appear in April and May.  Sach
*MORUS alba pendula. Weeping Mulberry. Weeping habit and round head, the long, thin branches forming an umbrella-like structure. Each 10 5 to 6 ft., 1-yrhead \$3 50 \$31 00 5 to 6 ft., 2-yrhead 5 00 45 00
OXYDENDRUM arboreum. Sourwood. The long, loose panicles of flowers appear in July, and when the blooming season is over, the long leaves, so far shining green, change to a conspicuous bronzy red. Both foliage and stems are quite smooth

 Platanus orientalis, continued green, generally five-lobed. The bark peels off the trunk and branches in autumn, leaving the whole tree of a creamy white all through the winter; the globular fruits are prickly and hang on through winter. As a shade tree, it cannot be excelled.

Each 10 to 12 ft., 1½ to 1¾-in. cal...\$4 75 \$42 50

POPULUS alba nivea. Silver Poplar. A very conspicuous tree. Foliage green above, silvery white and downy beneath, making a wonderful contrast.

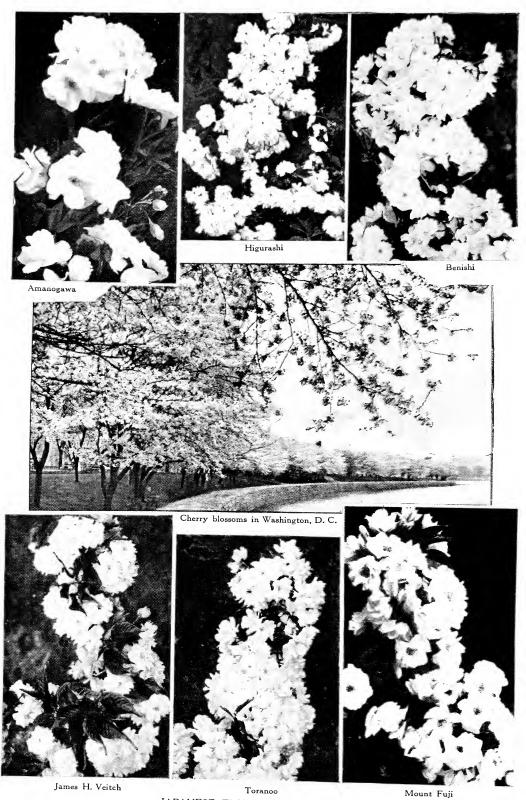

nigra italica (fastigiata). Lombardy or Italian Poplar. One of our most ornamental and picturesque trees; of remarkably rapid growth and erect habit; triangular leaves smaller than preceding. Admirable for formal and general landscape effects and very largely planted as screens and windbreaks.

Platanus orientalis

JAPANESE FLOWERING CHERRIES

# Japanese Flowering Cherries

N BLOOM early in April, the single Japanese Cherries are the earliest trees to blossom. Flowering so soon after winter has passed enhances their delicate and ethereal beauty to a transcendent degree. So numerous are the species and varieties of Cherries that different sorts bloom over a period of at least five weeks. The double varieties begin to flower when the single sorts are passing. They range in color from deep pink to pure white.

All Japanese Cherries are surface-rooting and grow very well in almost any location, even in very shallow soils. They make splendid specimens for individual planting on the lawn. The stronger-growing sorts are

even suitable for avenue trees.

Japanese Flowering Cherries have made their native country famous throughout the world as "The Land of Cherry Blossoms." On the banks of the Potomac, at Washington, D. C., thousands of visitors each spring enjoy the magnificent display furnished by the specimen trees presented to the United States by the Japanese Government, a most charming and characteristic Japanese gesture. A similar display may be seen near the Soldiers' Monument on Riverside Drive, New York City.

The varieties listed below are the most meritorious.

As it is difficult to list sizes and prices in this catalogue for the reason that in a short time many varieties and sizes may be exhausted, we issue a special list which is kept up-to-date. This special list will be mailed on application.

Amanogawa (Prunus lannesiana erecta). Fastigiate habit when mature assumes a columnar form. Semidouble, soft pink flowers.

Benishi. A good variety with double rosy pink flowers shading to bluish.

Gyoiko (P. lannesiana, Gioiko). A very floriferous variety with greenish yellow flowers, having red stripes, and turning pink when fully open.

Higurashi (P. lannesiana amabilis). Double rose-pink

flowers.

Hosokawanioi (P. lannesiana, Hosokawa-odora). Double shell-pink flowers.

James H. Veitch (Fugenzo; P. serrulata sachalinensis, Fugenzo). One of the very best varieties. The large, double pink flowers with reddish green calyx make a strong contrast with the foliage.

Mount Fuji (Shirotæ; P. lannesiana, Shirotæ). One of the very best white varieties. Flowers very large, double, white, very conspicuous.

Shirofugen (P. serrulata sachalinensis albo-rosea). Large, double, pinkish white flowers.

Toranoo. Excellent variety with double rosy pink flowers.

PRUNUS rosea pendula (Shidare-Higan; P. subhirtella pendula). Weeping Japanese Cherry. This, no doubt, is one of the most beloved Japanese Cherries. As a lawn tree, it can hardly be excelled. The weeping, slender branches are covered with a multitude of light pink flowers which appear long before any of the other Japanese Cherries come in Each 10

Crown on 5½ to 6-ft. stem.....\$6 oo Specimens with heavy crowns...10 oo \$50 00

QUERCUS palustris. Pin Oak. A superb and very distinct tree, with graceful, drooping branches. Pleasing bright green foliage, deeply lobed, with sharp points, changing to deep red in autumn. Very valuable as a lawn tree and for avenues. Each

# Deciduous Flowering Shrubs

RREGULAR massing is the most picturesque method of planting shrubs, and a selection of varieties suitable for every requirement can be made from the following extensive list. Should the shrubs arrive frozen, thaw them out gradually in a cool place.

When planting, the best way to maintain a balance between roots and branches is to cut the latter back half their length. The holes should be made large enough to allow the roots to be spread out in a natural way. Firm planting is essential to the future well-being of the shrubs. Leave a shallow depression around the plant, so that water will not flow away. The topsoil should be kept loose to a depth of 2 to 3 inches; this aids in retaining the moisture. Annual pruning should be done directly after flowering.

If heavy bushes are desired, we have many specimens that will produce immediate effect.

We fill every order with shrubs dug fresh from our Nurseries, as winter storing decreases their vitality.

ACANTHOPANAX pentaphyllum (Aralia pentaphylla). Five-leaf Aralia. A distinct, ornamental shrub, with graceful, arching branches and bright green foliage, borne in fives and sevens. Admirably adapted for banks and slopes.  2 to 3 ft
ALTHÆA. Rose of Sharon. In variety. Each 10 2 to 3 ft
AMELANCHIER canadensis (Botryapium). Common Dwarf Juneberry. A very fine, early-flowering variety, bearing showy white flowers, which are succeeded by small, purplish fruits; the young leaves are covered with white hairs. Each 10 1½ to 2 ft. 5 ft. 125 10 00

# Deciduous Azaleas

For Evergreen Azaleas, see pages 13 to 18

POR brilliant coloring and profusion of bloom, there are no other shrubs that can rival the Azaleas-When in bloom the whole bush is one mass of color, varying in softness, according to variety, from pure soft solid tone to flaming tints of the Mollis varieties. With conditions similar to those where rhododendrons thrive, semi-shady and moist, they flourish remarkably well and any extra care, such as a mulch of leaf-mold each fall, will be repaid by a wonderful floral display the following spring. For more

details as to their cultural requirements, see

Rhododendrons, pages 11, 12.

Azalea mucronulatum (longistylum)

Azalea mollis. Chinese Azalea. Notable for the variety and delicacy of its numerous shades of yellow, terra-cotta, apricot, and golden salmon flowers. Quite hardy in this latitude, and thrives under ordinary garden treatment, but best in a partially shaded protected spot. Useful for undergrowth among tall trees or as a border for large shrubberies. Blooms in April and May. See color illustration, opposite page 3.

—, Miss Louisa Hunnewell. A wonderful, new hardy Azalea which does well as far north as Massachusetts. It is a hybrid between the yellow flowered Chinese Azalea mollis, and the salmon-red Japanese Azalea japonica. The large flowers are generally orange-yellow at times shading to salmon. The main feature outside of color is that it is bud-hardy in the New England States.

mucronulatum (longistylum). A very early-flowering Chinese Azalea which unfolds its blossoms at the time that the Forsythia or Golden Bells are in bloom, with which, by the way, they form a wonderful color contrast. The flowers are of a lavender and soft pink tone. This extremely hardy shrub grows eventually to a height of 5 to 6 feet.

2 to 2½ ft......\$5 00 \$40 00

—schlippenbachi. Royal Azalea. A vigorous plant 3 to 5 feet high, with very large, showy flowers of pale rose-pink, the upper petals lightly spotted with brown.

Each

8 to 10 in........\$5 00

### Azalea Pontica

These, the Hardy Ghent Azaleas, have always been popular, but are not used in mass enough for home owners to appreciate their wonderful beauty. The lustrous leaves when young are covered with silky hair, and in autumn turn to dull red and brown. In association with rhododendrons, they make a fine effect; for best results they should be treated similarly. We have at present a unique and rare collection of specimen plants in many varieties as listed below. Note color illustration on page 33.

Azalea pontica Type	Each	10
12 to 15 in	.\$2 75	\$25 00
15 to 18 in	. 4 00	36 00

Ariadne. Double. Light rose or flesh color, overlaid light yellow.

Beaute Celeste. Single. Very attractive deep rose. Bouquet de Flore. Single. Rosy salmon, inner upper petal yellow, white lined.

Bijou de Gendbrugge. Double. Light pink, suffused white.

Chromatella. Double. Rosy salmon, overlaid with yellow.

Coccinea. Single. Deep crimson; very showy. Coccinea Speciosa. Single. Reddish orange.

Davies. Single. Creamy white.

General Trauff. Single. Rosy salmon with yellow upper petal.

#### AZALEA PONTICA, continued

Gloria Mundi. Single. Orange, overlaid red.

Milton. Double. Creamy white, overlaid light yellow.

Nancy Waterer. Single. Pure yellow.

Narcissiflora. Double. Pure lemon-vellow.

Orange. Single. Orange, slightly suffused with salmon.

Pallas. Single. Scarlet-orange. One of the most striking in color.

Perfecta. Single. Orange, overlaid red.

Prince Henri des Pays-Bas. Single. Pleasingly variegated red and white, with yellow upper petal.

Raphael de Smet. Double. Light pink, tinted salmon; fringed petals.

Rembrandt. Single. Very attractive rosy

Sang de Gandbrugge. Single. Orange, overlaid rose; upper petal distinct golden

Unique. Single. Deep orange-yellow. A very showy and distinct variety.

William III. Single. Orange, overlaid rose; upper petal distinct golden yellow.

We have all the varieties of Azalea pontica and A. rustica listed in extra-fine, bushy specimens ranging from 2 to 3½ feet high, and about the same wide.

A special list showing varieties, sizes, and prices of these specimens of A. pontica and A. rustica varieties will be mailed upon request.

### Azalea Rustica

A beautiful race of plants, resulting from crosses between Azalea mollis and A. pontica. The extremely double flowers are very distinct in shape, texture, and coloring, and are tubular at first, opening trumpet-like. The petals appear semi-transparent. Consistent with their beauty is the delicate and refreshing fragrance of all varieties. While they do well in open positions, they prefer semi-shade.

Aida. Double. Pleasing shade of salmon-rose. Hora. Double. Salmon-yellow, creating a beautiful bronze effect.

Il Tasso. Double. Light salmon-rose. Norma. Double. Deep salmon.

Phidias. Double. Light creamy yellow, overlaid rose. Praxiteles. Double. Pleasing light yellow, suffused soft pink.

Ribeira. Double. White, with yellow throat, edged nink.

A special list of sizes and prices of Azalea Rustica will be mailed on request.

#### Native Azaleas

Perfectly hardy, vigorous shrubs, suitable above all for naturalizing in locations similar to their natural habitat—Arborescens on hillsides with Calendulacea, Canadensis, and Viscosa by water-courses, etc. They are easy to establish if they are given the same sour-soil treatment as recommended for rhododendrons, being somewhat more particular in this respect than the varieties immediately preceding.

#### Berberis

All the Barberries are interesting and most of them are very beautiful in foliage and fruit. The arrangement of the leaves and spines of some of the newer types described here is a source of never-ending wonder. They thrive under almost all conditions except dense shade and continuous dampness, but do best in a reasonably fertile soil and full sunshine. All of them have curiously arranged spines and bear attractive fruits which persist into the winter.

Berberis aggregata. A vigorous shrub with leaves nearly an inch long, spiny. Brilliant salmon-red, almost globular fruits in dense clusters. Potgrown plants, 75 cts. each.

autrocarpa. A very fast grower. 75 cts. each.

buxifolia. Magellan Barberry. A very compact, dwarf, bushy grower, resembling somewhat the common Boxwood. Well adapted for edging beds.

Each 10

Pot-grown plants......\$1 00 \$8 00 buxifolia nana (dulcis nana). An even smaller, more compact grower than the foregoing. Very desirable. Pot-grown plants, 75 cts. each.

diaphana. A compact shrub 2½ to 3 feet high, valued chiefly for its brilliant autumn foliage. Splendid for massing or for accent points in the shrubbery. Pot-grown plants, 75 cts. each.

dictyophylla. A distinct type, whitish on the stems and on the underside of the leaves. Vigorous up to 6 feet. Flowers large and yellow; fruits red. Pot-grown plants, 75 cts. each.

heteropoda. A handsome, very distinct species from Turkestan. Grows 3 to 6 feet tall; very spiny. Flowers orange-yellow and fruits dark blue. Potgrown plants, 75 cts. each.

2 to 3-ft. specimens..... 2 50

Juliana. See page 48.

Berberis Sieboldi. A very choice type, growing slowly into an upright, compact bush 3 teet high. The unfolding leaves are purplish with green veins, and turn rich red in autumn. The shiny red fruit is bright all winter. Pot-grown plants, 75 cts. each.

stenophylla. A pretty garden hybrid Barberry with rather large, spiny-pointed leaves and clusters of yellow flowers. Pot-grown plants, 75 cts. each.

Thunbergii. A beautiful Japanese variety of dwarf habit. The spray-like branches have spines on them, and are covered with small foliage, changing to beautiful red in autumn. It bears a mass of bright scarlet fruit, which is very attractive during the winter months. Very desirable for grouping; a fine low hedge plant.

For larger quantities, see Hedge Plants, page 48.

## Hydrangea hortensis

Blue Hydrangea See page 53 for list of new varieties

Among the most valuable and most effective flowering plants, all of the varieties of *Hydrangea hortensis* must be included. They are valuable not only as forced for Easter decoration by the florists, but even more so when used for outdoor decoration of the porch, the garden, and the lawn. When allowed to bloom in their natural flowering period of July and August, these plants are extremely desirable.

plants are extremely desirable.

The Hydrangeas are, without doubt, the very best for seashore planting. The wonderful sight produced at the resorts along the coast of New Jersey by the great banks of Hydrangea bloom is something that cannot be soon forgotten. There, and also in Rhode island, plants may be seen which have reached a height of over

6 feet and a diameter of 10 to 12 feet.
When planted in moist soils, the Hydrangeas naturally produce pinkish flowers, in other soils the flowers may come blue. Blue flowers may be assured by mixing about one-half pound of alum with each bushel of soil. Water, in which iron has been rusted, may also be used, as well as iron filings which can easily be incorporated with the soil.

Generally, the Hydrangeas are shipped in pots or tubs, but it is not necessary to grow them that way. In fact, when planted out of pots they will do wonder-

fully well.

For protection during the winter months, the tubbed plants should be moved into a cool cellar where they will not freeze, and should be kept just moist enough to keep the roots from drying. The larger plants, grown in the ground, may be protected by boxing them, while the smaller ones may be covered with leaves and straw and tied up in a canvas or some other waterproof material.

Hydrangea opuloides otaksa (otaksa). Immense heads of either pink or blue flowers. This variety is extensively used for growing in pots and tubs. Each

Plants in tubs......\$3 50 to \$5 00 Specimens...... 7 50 to 15 00 Hydrangea Domotoi. This variety is an improvement rangea Domotoi. This variety is an improvement on the popular Hydrangea otaksa, having beautiful double florets which give the bloom a large, compact, solid appearance and better lasting qualities. This variety does well wherever H. otaksa will flourish. Each

#### Malus Flowering Crab-apples

The flowering Crab-apples are bushy shrubs or small trees with flowers of deep carmine varying to the most delicate pink and white. In the fall, the conspicuous red or yellow fruits, interspersed through the charming green foliage, are equally attractive. These fruits, as they reach maturity, are keenly relished by birds. There is no better way to attract these feathered friends than by planting Crab-apples to provide them winter food. The real value of the Flowering Crab-apples does not seem to be widely known or appreciated. A visit in the

The real value of the Flowering Crab-apples does not seem to be widely known or appreciated. A visit in the spring to the Arnold Arboretum, at Boston, where hundreds of Flowering Crabs may be seen in a great cloud of color, leaves an impression that is never forgotten.

The Flowering Crabs lend themselves well to lawn

#### MALUS, continued

planting. Over large areas, they may be placed in groups, but on smaller lawns they may be used as specimens. When added to the shrubbery border, either individually or in groups, they greatly enhance the value of the planting with their profusion of color. In general, the Flowering Crabs will more than repay the owner for the little care necessary for their growth.

Lilac garden of the late Professor Sargent. A rare Tree Peony is shown in front of the scarlet poppies.

Tree Peonies are offered in our Perennial Catalogue

## Syringa · Lilac

Without doubt, one of the most popular spring flowers, not only in the garden, but for cutting also. The sweet fragrance of the Lilacs permeates the air and the beautiful flowers seem to have reached the ultimate of delicate and refined color.

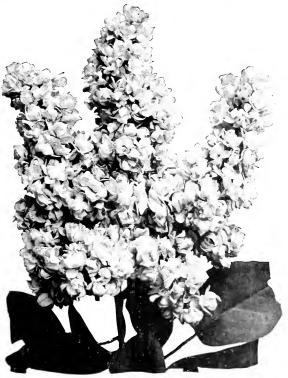

The Lilacs are extensively used, singly as well as in, masses in the lawn. When massed, the effect produced readily establishes the great value of these plants. They may be used also in the shrub borders, for screening, and, in fact, for almost any purpose where heavy, luxuriant foliage and large shrubs can be used. See

color illustration above.

Lilacs flourish in any good garden soil, but prefer a loam of heavy composition. It tends to make both larger plants and larger and more abundant panicles of flowers. Lilacs are naturally fast-growing plants. To keep them at their best over a period of years, occasional loosening of the soil, together with applications of liquid cow manure, will bring ample reward in the form of luxuriant plants. Two pounds of bone-meal per plant, mixed in the soil before planting, will also help considerably for several years. After the plants have flowered it is very important to remove the wilted blooms immediately before the seed-pods develop, as these will be detrimental to the development of the flower-buds for the following year. The necessary pruning, too, should be done immediately after the flowering season, because if done early in spring before the bloom comes, many flower-buds will be cut away.

SYRINGA japonica. A tree-like form, with glossy, leathery leaves. It is quite hardy and the yellowish white flowers come after other Lilacs are through blooming.

Cratægus Oxyacantha Hedge

# Hedge and Bordering Plants and Windbreaks

ROM the following list a hedge of any description can be selected, either formal, natural or defensive. The hedge is a part of the grounds and garden, and in every way is more picturesque than an artificial

As a general rule, hedge plants should be planted low and firm, so that the branches from the main stem apparently spring from the ground. In this way a solid hedge is acquired. In planting California Privet for hedge purposes, it is well to set the plants an inch or two deeper than the union of the lower branches with the main stem. This causes the plants to sprout close to the ground and form a close, thick hedge. If a dense hedge is desired, prune back hard for two or three years, as this encourages growth from the base. Where a wide hedge is required, dig a trench not less than 2 feet wide, and place the plants alternately at the distances noted in parentheses.

Dutchman's Pipe covering porch

# Hardy Vines

ARDY Vines and Climbers do much toward beautifying a home by covering banks and bare spots, ARDY Vines and Climbers do much toward beautifying a home by covering banks and bare spots, and giving comfortable shade and pleasing fragrance to the pergola and veranda. There is a wide diversity of types, so that vines may be selected to harmonize with all surroundings. By careful selection, a succession of bloom may be had. Some vines are best suited for shade, while others are distinctly of value for the embellishment they give to the house, porch or veranda, by reason of the large beautiful flowers they bear. Among these might be specially mentioned the various large-flowering Clematis and the different forms of Wisteria. Most of them require some support, but the Ampelopsis, Hedera, etc., climb by aërial rootlets and will cling to brick, stone, or rough wood surfaces. These are very useful for softening the rough corners of the house, and are of decided benefit to a wall inclined to be damp.

The vines should be firmly planted in a deep rich soil afterward watering thoroughly. An occasional

The vines should be firmly planted in a deep, rich soil, afterward watering thoroughly. An occasional dressing of decayed manure will assist them in making a strong growth.

top-dressing of decayed manure will assist them in ma

House of Forcing Azaleas

# Greenhouse Department

#### FORCING PLANTS FOR AUTUMN AND WINTER DELIVERY

• To relieve the dullness of the long winter months, we have grown for you the following groups of plants which will bring to your home, greenhouse, or conservatory, many of the spring flowers which we so eagerly await during May and June.

Just recall, when motoring last spring, how you admired the vari-colored flowering Crab-apples, Lilacs, and Plums, permeating the air with their fresh, sweet, fragrance; the wonderful Azaleas and Rhododendrons showing so

modestly their picturesque beauty; and many other species seen when rambling through the country

Did it ever occur to you that you have at your command plants in dormant condition that will give you the same blossoms and charm during the time when snow, sleet, and ice keep you confined to your home? These plants, mostly pot-grown, can easily be forced into bloom by giving them the proper heat and moisture. A range of greenhouses is not needed—your conservatory or sun-parlor will answer the purpose.

# Azaleas for Forcing

#### Azalea indica

This splendid group of Azaleas is grown exclusively for forcing and can be had in about sixty varieties, both in bush and standard form. Below we list some of the leading sorts:

#### EARLY-FLOWERING VARIETIES

Mme. Petrick. Fine, large, double bright rose, almost

cerise flowers. Compact grower.

Mrs. Frederick Sanders. Large, double, salmon-pink flowers. Large foliage. Spreading habit.

Simon Mardner. Large, double, light-pink flowers. Medium-sized foliage. Vervæneana. Fine, double, rose-salmon flowers with white margins. Very fine large foliage.

#### LATE-FLOWERING VARIETIES

Blushing Bride. Large, pale-rose flowers and choice green foliage. Spreading type.

Empress of India. Double, rosy salmon flowers.

Jean Haerens. Very double, rosy carmine flowers.

Mme. Vander Cruyssen. Semi-double; pink. Prof. Walters. Profusion of single, pink flowers, with

darker center and fringed edges. Bush-form; well-budded. Crowns 8 to 10-inch diam..... 
 Crowns
 8 to 10-inch diam.
 \$1 50

 Crowns

 12 to 14-inch diam.
 2 50
 4 00 7 50 Crowns 12 to 14-inch diam..... Crowns 14 to 16-inch diam..... Larger sizes and specimens, price on application.

Standard-form; well-budded.

Ranging in price from \$10 to \$25 each.

If interested in other varieties and sizes, we shall gladly submit a complete list of Azalea indica varieties.

#### Azalea Kurume

These highly interesting Azaleas were originally imported from the city of Kurume in Japan. Although not exactly new, they are still scarcely known, and we highly recommend them for forcing. Below we list some of the leading varieties. list some of the leading varieties:

Bridesmaid. Glowing salmon flowers, produced in

very large clusters; very prominent stamens. Cherry Blossom. Large, light pink flowers with white shadings toward the center. Christmas Cheer. This name was suggested by its

very brilliant color—a real Christmas red.

#### AZALEA KURUME, continued

**Coral Bells.** Pleasing coral-pink, shading deeper in the center; a very dainty flower. Small, round, glossy foliage.

**Hexe** (Firefly). A very dwarf, compact grower, with single crimson flowers. One of the best.

Pink Pearl. Beautiful salmon-rose, shading light toward the center; large, full trusses.

Salmon Beauty. Exceptionally fine shade of salmon-pink with large individual flowers. Light green foliage.

Prices as follows; well budded. Each Crowns 8 to 10-inch diam.\$2 00 Crowns 10 to 12-inch diam. 3 00 Crowns 12 to 14-inch diam. 4 00 Crowns 14 to 16-inch diam. 5 00

If interested in other varieties and sizes, a complete list will be mailed upon application. For descriptions of other varieties, see pages 16, 17.

#### Hardy Azaleas for Forcing, Well Budded

Amœna. Rosy purple. Each Crowns 12 to 14-in. diam. .\$3 00 Hinodegiri. Bright scarlet. Crowns 12 to 14-in. diam. . 4 00 Kæmpferi. Beautiful orange to salmon. 15 to 18 in. high. . 3 00

Mollis. In shades from red to yellow. 12 to 15 in. high... 3 50 For other varieties of Hardy Azaleas, see pages 13-16.

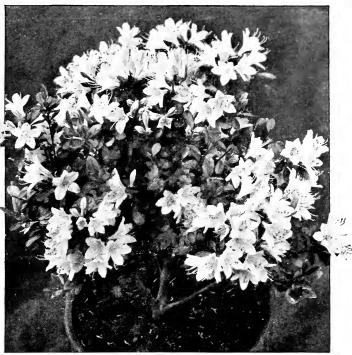

## New and Scarce European Varieties for Forcing

Goliath. Rose-pink. Early. Strong grower. Gertrude Glahn. Very large; dark rose. Mme. Ph. de Vilmorin. Reddish carmine, fringed flowers.

Matador. Dark red. Medium grower.

Hydrangea

Kurume Azalea

Mrs. H. J. Jones. Rosy pink.
Rubis. Light red. Compact grower.
Sensation. Carmine-red; large flowers. Excellent grower.
Souv. de Mme. A. Boullet. Large; rosy pink.

Supreme. Dark red.
Triomphe. Light red; large trusses. Compact grower.
Prices for pot-grown plants, fall delivery only.

Each

For other varieties of Hydrangeas, see pages 38, 48.

#### Metrosideros · Bottle Brush

An evergreen shrub of medium size with long, narrow, dark green leaves and terminal spikes of crimson flowers.

Bush-form,  $5\frac{1}{2}$  to 6-in. pots. . . . . . \$2 to \$2 50 Standard-form, 6-in. pots, 30-in. stem . . . . 3 00 Standard-form, 6-in. pots, 32-in. stem . . . . 5 00

#### Rhododendrons

Rhododendron Hybrids.

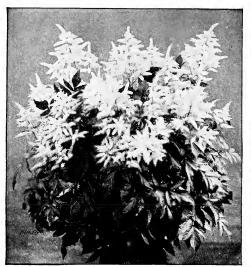

Well-budded plants in various colors, for forcing. 18 to 24 in. high, \$6 to \$7.50 each.

#### Roses

We always have, for fall and winter delivery, an excellent grade of Climbing, Hybrid, and Polyantha Roses (Baby Rambler type), for forcing.

Prices and other information given upon application. Please state distinctly in your letter that these Roses are wanted for forcing.

Spiræa, Gladstone

### Spiræa

## FORCING CLUMPS FOR FALL AND WINTER DELIVERY

# Flowering Shrubs for Forcing

**CAMELLIA japonica.** Fifteen named varieties. Ask for special circular.

DAPHNE odorata. Nice plants. \$3 each.

DEUTZIA gracilis. Slender Deutzia. A compact, dwarf shrub, producing masses of white flowers. Pot-grown plants, \$1.50 each, \$10 for 10.

**LILACS.** This group of plants is too well known to need further introduction. We herewith list the varieties best adapted for forcing.

Charles X. Single; blue to violet-red.
Hugo Koster. Single; pure lilac.
Marie Legraye. Single; white.
Michel Buchner. Double; clear lilac.
Mme. Casimir-Périer. Double; white.

Mme. Casimir-Perier. Double; white.

Mme. Lemoine. Double; white.

Souv. de Louis Spaeth. Single; deep rosy purple.

Pot-grown plants, well-budded, 7 to 8-in. pots, \$3.50 to \$5 each

MALUS. Flowering Crabapples.
Atrosanguinea. Carmine Crab. Deep carmine.
Floribunda. Japanese Flowering Crab. Warm red buds opening to light pink.
Scheideckeri. Scheidecker Crab. Very double

Scheideckeri. Scheidecker Crab. Very double flowers of light rose.

Strong pot-grown plants, well-budded, 6, 7, and 8-in. pots, \$3 to \$6 each

PRUNUS persica. Double-flowering Peach. Can be had in Pink, White, and Red, your selection. Pot-grown plants, well-budded, \$3 to \$4 each.

triloba. Double-flowering Plum. Large, delicate pink flowers. Pot-grown plants, well-budded, \$2.50 to \$3.50 each.

trichostyla sinensis. Double-flowering Almond. White and Pink, your choice. Pot-grown plants, well-budded, \$2.50 to \$3.50 each.

SPIRÆA Vanhouttei. Produces a mass of pure white flowers. Pot-grown plants, well-budded, \$2.50 each.

# Decorative and Flowering Plants

FOR CONSERVATORY, SUN-PARLOR, HOUSE, PORCH, WINDOW, AND LAWN DECORATION

We have extra-fine stock of these plants and shall be glad to have prospective purchasers visit our nurseries to inspect them.

## Agapanthus · African Lily

A splendid ornamental plant for lawn, terrace, or piazza. Umbels of bright blue flowers. 5-in. pots, \$1 each; 6-in. pots, \$1.50; 10-in. tubs, \$5.

#### Araucaria · Norfolk Island Pine

This popular house-plant grows very symmetrical, with branches growing out of the center stem in tiers, each tier being distinctly separate from the one below it. Does best in a cool room or sun-parlor, and may be used on the veranda in the summer; should not be placed in the full rays of the sun. 5-in. pots, \$2.50 each; 6-in. pots, \$4; 8-in. pots, \$7.50. Specimen plants in 8-in. tubs, \$10 to \$15.

#### Aucuba

#### The Evergreen Window-box Plant

Some varieties have variegated and others glossy, dark green leaves; your choice. While a good plant for all indoor purposes, it is also extensively used for window-boxes, piazza, and veranda decoration. Also excellent for city gardens as it will stand dust and smoke very well. In this case they must be lifted in the fall and taken indoors or put in a pit. Do best in semishaded positions. 4-in. pots, 50 cts. each; 5-in. pots. \$1.25; 6-in. pots. \$2.

Araucaria

Aucuba. See page 54

## Rex Begonia

These old-time foliage plants are very desirable for the striking color combinations of the individual leaves. 4-in. pots, \$1 each; 5-in. pots, \$2.

## Clivia (Imantophyllum)

This is an excellent house plant, very easy to keep, with handsome, dark green, glossy sword-shaped foliage. The flowers are borne in very large umbels of bright scarlet, with yellow throat. 6-in. pots, \$4 each; 7-in. pots, \$5.

#### Boston Fern

#### Nephrolepis Bostoniensis

This variety has proved immensely popular as a house plant, on account of its graceful, robust habit and splendid durability. Specimen plants, \$3.50 to \$5 each.

Phœnix Rœbelini. See page 56

### Hydrangeas in Tubs

Most satisfactory for lawn and piazza decorations. Should be kept in a sheltered place during the winter. \$3.50 to \$5 each.

#### Pandanus Veitchi · Screw Pine

The graceful, curved, light green leaves are beautifully marked with broad stripes and bands of pure white. A splend d house p ant. 5-in. pots, \$2.50 each; 6-in. pots, \$3.50; 7-in. pots, \$5.

#### Palms

Kentia Forsteriana. The str'king, tropical foliage of this plant adds much to any decoration, especially in a hall or conservatory. Used singly in the house, this Palm makes a magnificent appearance.

6-in. pots, 30 in. high\$4	00
7-in. tubs, 36 in. high 7

Larger sizes and specimens, price on application.	

Boston Ferns

Phœnix canariensis

#### PALMS, continued

Phenix canariensis. Canary Date Palm. One of the finest vase and tub plants for outdoor decoration. Very robust, and yet of graceful habit. Will not burn under the hottest sun, and remains unaffected by severe summer storms. Thrives under more unfavorable conditions than any other Palm.

7-in. pots, 24 to 28 in. high\$3	
8-in. tubs, 30 in. high	
10-in. tubs, 36 to 40 in. high	00
12-in. tubs, 42 to 48 in. hig'1	00
Larger and specimen plants\$20 to 25	00

Phœnix Rœbelini. Rœbelin Palm. The long, graceful sprays of foliage are of a rich dark green. This Palm is conceded to be the most dwarf of all the Phœnix family, being actually pygmy in character.

6-in. pots, 5-6 ft. high. 2 50 20 00		
7-in. pots, 6-7 ft. high. 3 oo 25 oo		

## Hedera

HEDERA helix dentata variegata. A beautiful, large-leaved, variegated Ivy, extremely useful for conservatory. 4-in. pots, 2 ft. high, \$1 each.

#### Lantana

Trained in tree or standard form, 30 to 36-in. stem. Always useful for formal effects on terraces or for bedding out among dwarf sorts. \$4 each, \$35 for 10.

## Heliotrope

Trained in tree or standard form, 30 to 36-in. stem. Used extensively for the same purposes as the Tree Lantanas but especially valued for their fragrance. \$4 each, \$35 for 10.

## Epiphyllum truncatum

(Zygocactus truncatus)

Crab Cactus

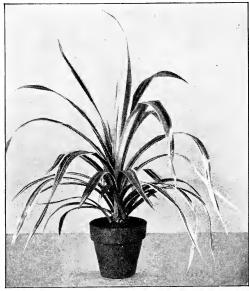

This worthy house plant, a most forgotten, with its large, showy, tubular rosy red flowers, that appear late in winter or early spring, lasting for several weeks, should also be in every conservatory. 4-in. pots, 75 cts. each; grafted plants, \$2 each.

## Ficus repens

Excellent climber for covering indoor rockery and greenhouse walls. Strong plants from 4-in. pots, 50 cts. each, \$4 for 10.

### Oleanders

We have these old, well-known Oleanders, often admired by the public at large, in Red and Pink. Fine bushy specimens from 16-in. tubs, 3-ft. stem, 30-in. crown, \$20 each.

Pandanus Veitchi. See page 55

## Fruit Trees

For the benefit of those requiring immediate results, we have grown a heavier grade of trees than generally sold by fruit-tree growers on a large scale. These trees will come into bearing several years sooner than the regular sizes.

Special list showing varieties, sizes, and prices will be sent upon application

# Nectarines and Peaches for Forcing Under Glass

For fruit-lovers having the proper facilities and who admire the delicious flavor of these fruits, we grow an up-to-date collection of varieties, some in bush-form, and others partly trained. We are listing below some of these varieties.

We will send, upon application, a special list kept up-to-date, showing quantities, varieties, sizes, and prices.

#### VARIETIES OF NECTARINES FOR FORCING

Elruge Lord Napier Humboldt Milton Newton New White Pineapple Red Roman Rivers Orange Spencer Victoria

#### VARIETIES OF PEACHES FOR FORCING

Alexandre Noblesse Barrington Duke of York Early Rivers Golden Eagle Peregrine Princess of Wales Thomas Rivers

## Figs

Figs can be successfully grown in greenhouses and even outdoors in tubs as long as they are brought inside for the winter months. In sheltered positions outdoors, they will do well as far north as Baltimore.

Following varieties in pots at \$3 to \$5 each

Brown Turkey. Very handsome; brownish purple; rich and excellent for dessert.

Celestial. Pale violet; sweet and tender; finely flavored. An excellent variety. Vigorous and productive.

Magnolia. An excellent early variety.

Young Apple Tree

## Greenhouse Grapes

Pot-grown for forcing, 6-in. pots, \$6.50 each

Muscat of Alexandria Barbarossa Canon Hall Madras Field Court Black Hamburg

## "Rutherford Park" Lawn Grass Seed

Our "Rutherford Park" Mixture will make a close, thick turf in a very few weeks. It roots deeply, enabling it to withstand severe droughts, consequently maintaining its beautiful rich green color the entire season. The "Rutherford Park" is no doubt the lowest priced Lawn Grass seed offered; not particularly on account of the price, but more from the points of quality and quantity of seed to the bushel, which contains 20 pounds of the finest kinds and varieties of grasses used for lawn purposes. We believe this mixture to be among the best now on the market, and we ask our customers carefully to consider this before placing their orders.

We will supply any quantity our customers may desire, to meet the needs of the ground on which it is to be sown. The quantity required for making new lawns is 80 to 100 pounds to the acre; for renovating old lawns, 20 to 40 pounds. For a new plot  $15 \times 25$  feet, or 375 square feet, two pounds are required, and one pound for renovating old

lawns of the same dimensions.

We sell Grass Seed by weight only. For comparison: one quart is a little more than one-half pound; one peck is equal to 5 pounds; one bushel, 20 pounds.

45 cts. per lb., \$42.50 per 100 lbs.

Fertilizers for Lawn, Garden, and Greenhouse

Prices on application

## Plant-Tubs and Boxes for Porches and Lawns

Much can be said in praise of the wood our tubs are made from, namely, "Heart Cypress," but briefly it has proved to be decidedly superior to all other woods, not only in durability but in appearance. It does not need a coating as a filler, as the wood naturally contains a certain amount of oil. Consequently it does not warp, shrink or swell, and in general it is the wood for plant-tubs.

Our workmanship on these tubs is equally good. No tub goes from our shops that has not been thoroughly made, and made to last for years, and our tubs are serviceable for practically every situation.

Sometimes architectural features will call for a more decorative tub, and for such purposes we have designed

various other kinds in addition to the ordinary round tub.

Among them the most popular are the square tubs Nos. 1, 2, 11, 12, 13, all being illustrated here. The prices have been computed so as to be as low as it is possible to make them, consistent with the quality of tub we turn out.

If you need tubs, buy good ones, and they will last you for many years. Most tubs, of course, look alike in the store when they are freshly painted, but it is only after using them for a year or so that their value can be realized Bobbink & Atkins' tubs are made not only to look nice, but to last. The designs here mentioned are a few of the many that we make. If you need a special design, we can make it, and will be glad at any time to quote you a price upon any size you may need, if you will be kind enough to furnish a rough sketch showing desired shape.

## Business Terms and Suggestions

WE WELCOME CORRESPONDENCE. We give inquiry careful attention, and ask that each inquiry be made as brief and clear as possible.

ORDER EARLY. It greatly facilitates shipment if orders are received early. Please write orders on Order Sheets accompanying catalogue.

IMPORTANT. When ordering, please advise if you wish goods shipped by express or freight, giving route for quick delivery. We cannot warrant prompt delivery when shipped by freight. Please write Name, Post Office, County, State, and Number of Street, plainly; also any other information necessary to expedite delivery.

PRICES are f. o. b. Rutherford, N. J. Packing is charged at cost. Postage will be charged at the rate of 10% on the amount of the bill for packages forwarded by Parcel Post. This catalogue cancels all sales conditions and prices in previous catalogues.

TERMS. Cash or satisfactory references must accompany all orders, unless the party ordering has an open account.

OUR RESPONSIBILITY. While we exercise the greatest care to have our nursery products all genuine and reliable, and hold ourselves prepared to replace, on proper proof, all that prove untrue, we do not give any warranty, express or implied, or guarantee them to live and grow or give specific results. In case of any error on our part, it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for a greater amount than the original price of the nursery products. No complaints will be considered that are not made within ten days after the receipt of our products.

COMPLAINTS. All errors and omissions in the execution of orders will be satisfactorily adjusted, if we are notified immediately upon receipt of goods.

SUPERINTENDENTS, HEAD GARDENERS, AND ASSISTANTS. We have a list of competent applicants awaiting engagements. We shall be glad to furnish these names to those requiring the services of trained Horticulturists.

HOW TO REACH OUR NURSERIES. Visitors invited. Our Nurseries, consisting of 500 acres, are located within 8 miles of New York City. Buses start from Astor and Waldorf-Astoria Hotels for Passaic and Paterson. Leave the bus at Paterson Avenue and Hackensack Street, East Rutherford, take jitney or trolley passing our Nursery on Paterson Avenue, East Rutherford. Rutherford is the first and Carlton Hill the second station on the main line of the Erie Railroad. Take the Hudson Tunnel at 33d Street or at Cortlandt Street Terminal—trains connect with the Erie Railroad at Jersey City. The Carlton Hill Station is only five minutes' walk from our Office and Nurseries.

OUR SHIPPING FACILITIES. We are admirably located to ship to all parts of the country, being only 8 miles from New York City. We can ship by express and freight via Erie Railroad from Rutherford, express or freight via D., L. & W. R. R. from Passaic, and by Carlton Hill Express Co., which connects with all railroad companies, boat and railroad lines leaving New York City and Newark. We advise large orders to be shipped in car-lots from Rutherford, as little or no delay occurs in shipping this way.

AUTO TRUCK DELIVERY. We are in a position to make deliveries by auto truck to points within 250 miles of Rutherford, N. J. Charges are made according to the size of truck required and the distance. The advantages of truck delivery are many; the cost of boxing, freight and cartage is eliminated; the stock is delivered in a much better condition than if packed in cases; and, above all, the products are landed on the grounds within a short time after being dug. It is the most satisfactory and economical method of transportation providing the order is of sufficient size.

TRANSPORTATION RULES. Our products are shipped and travel at the purchaser's risk. We do not guarantee safe delivery, except by truck. Our responsibility ceases when delivery is made to the transportation company or on the grounds of the purchaser. The ownership of all merchandise sold by us passes to the purchaser on delivery by us to the carrier, and the issuing of a receipt by the carrier ends our responsibility. Any claims for damage should be made promptly to the agent at the point of delivery.

Trusting again to be favored with your patronage and promising our best efforts to give satisfaction, we are,

Yours respectfully,

BOBBINK & ATKINS, Rutherford, N. J.
